Personal Statement

Software developer with hands-on experience across the full stack, from low-level C++/CUDA optimization to cloud-deployed web applications. During 2.5 years as a research assistant at RWTH Aachen, I reduced CT simulation runtimes by 60% and independently designed and shipped a React-based web platform used by research teams. At Audi AG, I coordinated a 60-person external development team across sprint planning and delivery cycles on a VW Group-wide service platform. My Bachelor's thesis in video coding inpainting (grade 1.0) reflects both my engineering rigour and my interest in applied algorithmic work. A fluent German speaker (C2), I thrive in environments where software has real-world impact and am looking for a junior developer role where I can contribute from day one.

Experience

Audi AG

Software Engineering Intern

Ingolstadt

May 2025–October 2025

Contributing to the development of Service42, the VW Group's system for in-dealership and OTA services. Supporting both software implementation and product coordination across international teams in an agile environment (Jira, Confluence).

WZL, RWTH Aachen

Research Assistant

Aachen

Dec. 2022–Apr. 2025

Full-Stack Software Development. Responsibilities include:

- Optimization and deployment of a CT scan simulation application (C++, CUDA, Docker, GitLab, Kubernetes), reducing simulation times by 60%.
- Design, development, and deployment of a web application to enhance user interaction and scale the CT simulation (React, JS, RestApi, AWS S3, Docker, GitLab).
- Automation of industrial measurement data analysis using Python and Pandas, significantly reducing processing times and generating visual reports for stakeholders.
- Debugging, maintenance, and documentation of legacy projects.

Responsible for GitLab deployments and close collaboration with research teams to adapt to evolving requirements and deliver reliable software solutions.

Education

RWTH Aachen University

B.Sc. in Electrical, Information, and Computer Engineering

Aachen

September 2024

Bachelor Thesis: *Edge-Guided Inpainting for Intra Prediction in Video Coding* (Grade: 1.0)

Deutsche Evangelische Oberschule

German High School Diploma (Abitur) – Grade: 1.8

Cairo

June 2018

Skills

Programming: Python, C++, JavaScript

Technologies: React, Git, GitLab, Kubernetes, AWS S3, Docker, Pandas, OpenCV

Languages

German: Fluent (C2)

English: Fluent (C1)

Arabic: Fluent (C2)
